Stand out from the crowd

John Michaloudis - MyExcelOnline.com

# Dedication:

**To YOU!**

**My long serving fans, my new found fans and my future fans that keep me motivated to bring out the best of me, so you can get better at this powerful but underutilized tool called Excel!**

**May your Excel journey enrich your life!**

**To my wife, Leyre, who has supported me, kept me on the straight and narrow, focused and helped raise our two beautiful children in Mikel and Ánne** ☺

# WHY I CREATED THIS PDF FOR YOU!

## G'day Excel Lovers!

**My Name is John Michaloudis and I am the Chief Inspirational Officer at www.MyExcelOnline.com**

Why Chief Inspirational Officer, I hear you say?

Well, it's because I have no boss (apart from my wife and kids) and I can choose whatever title I like ☺ Hey, I have worked long enough in the corporate environment and had awful titles, so it's time to enjoy my freedom!

I would like to welcome you to the MyExcelOnline family and thank you for signing up to my weekly blog and receiving this super awesome Excel resource guide, which will change your life!

How you say?

*"Learning is a treasure that will follow its owner everywhere…"* – Chinese Proverb

That is how!

Once you are full of Excel knowledge then this valuable tool will stay with you for life.

You can use it to be more efficient & effective in your daily job, help colleagues solve their problems, spend more time at home and get that feel good factor of fulfilment!

With that in mind, I created this comprehensive guide to make your Excel learning experience that much easier, save you time from googling and being diverted to sites that are not even Excel related.

I made these mistakes and I don't want you to do the same.

I have been around the Excel scene for the last several years and I have got to know the best blogs which will provide you with consistent and up to date Excel content, Excel forums that will get you out of an Excel jam, Excel courses that will make you stand out from the crowd and skyrocket your professional development, Excel books that will sharpen your skills and close any knowledge gaps, as well as hand-picked Excel add-ins that will save you heaps of time, so you can go home earlier ☺

*This e-book is interactive so you can click on any blue words and it will open the content in your web browser. If this does not work, you can right click and open the link that way or right click and copy the link, then paste it on to your web browser.*

# ABOUT THE AUTHOR

Just a bit about me.

I am a Greek-Australian (my parents are Greek and migrated to Australia where I was born and lived most of my life) and now for the last few years I have been living in Spain where I am married to a Spanish girl and have two beautiful children, Mikel and Ànne! Here is a recent pic of us over at the MyExcelOnline HQs in Spain, Vitoria.

I left my corporate job at General Electric in 2015 because I wanted to teach Excel to the masses, as I saw first-hand that there was a lack of Excel knowledge in the professional environment.

I created an **online Excel Academy course** and have never looked back!

**MyExcelOnline** was born out of that and I have since started an **Excel blog** where I post tips four times per week on Formulas, Pivot Tables, Charts & Analysis. I did not stop there!

I created an **Excel Podcast Show** where I interview fellow Excel experts and MVPs to share their stories and Excel insights to get the message out.

**I also have a couple of free Excel webinars so you can start learning Excel within the hour with our Free Excel Webinars!**

Now I have created this guide for you as I know there is a real need for this and I am sure that you will take lots of value from it. Feel free to share it with your colleagues ☺ Keep on EXCELling!

**John Michaloudis**

# ONLINE EXCEL COURSES

*Excel online courses are a quick way to learn Excel without the hassle of googling online or watching endless YouTube videos that don't give you the answer that you were after.*

*Online courses are structured, provide teacher support, allow you to watch online or download the HD videos and workbooks, as well as receive a certificate of completion!*

*They are also very cheap compared to live training seminars which can sum up to thousands of dollars with the extra travel costs, hotel, meals...and that doesn't take into account the stuffy conference rooms and distractions!*

*NB. Online course prices stated in this e-book are correct at the time of printing but may change at any time...*

| **Excel Users:** | Beginners-Intermediate |
| **Hours:** | 4 |
| **Online Access:** | 12 Months Online/Downloadable |
| **Price:** | $129/$259 |

## Description:

This short course give you a great introduction into Power Query and goes through its best features.

Power Query accesses, cleans and transforms messy data and displays it in a way that Excel loves and can work with.  So no more formulas, text to columns, trim spaces, vlookup, find & replace etc.

Apart from cleaning data, Power Query can append or merge two separate tables together (bye bye VLOOKUP!) as well as create extra columns in your data which can display your custom calculations!

You can use Power Query to perform transformations that would be very complex in VBA or SQL.  So goodbye VBA coding!

## Description:

If you are looking for a book that shows you how to get up to speed with the best used features for a data analyst's role, then you are sure to find what your role needs with this buffet style of Excel's analytical tools

This book includes step-by-step examples and case studies that teach users the many power tricks for analyzing data in Excel. These tips have been honed by Oz du Soleil, a former financial analyst charged with taking mainframe data and turning it into useful information quickly, and "MrExcel" himself, Bill Jelen.

Topics include data quality, validation, perfectly sorting with one click, matching lists of data, data consolidation, data subtotals, pivot tables, pivot charts, tables, and much more. This new edition has been updated for Excel 2013.

### Description:

Excel Tables are one of the most powerful but underused tools within Excel. I love them and use them on a daily basis and you should as well.

Creating tables in Excel allows for easier formatting and reporting, but the new syntax that it implies can be intimidating to the uninitiated. In this guide, one of the developers of the official Microsoft Excel 2013 templates—all of which employ tables—helps introduce readers to the multiple benefits of tables.

The book begins by explaining what tables are, how to create them, and how they can be used in reporting before moving on to slightly more advanced topics, including slicers and filtering, working with VBA macros, and using tables in the Excel web app. Novice Excel users and experts alike will find relevant, useful, and authoritative information in this one-of-a-kind resource.

| **Excel Users:** | Beginner |
| **Amazon Link:** | www.amzn.to/1p4CeDD |
| **PDF Link:** | www.myexcelonline.com/blog/dontfearthespreadsheetbook |

## Description:

Written in a question-and-answer format, this lowest-level beginner book covers the extreme basics of using spreadsheets in Excel.

Instead of delving into advanced topics that scare most Excel novices away, the guide starts at a much more basic level, quickly providing a passable knowledge of the program and allowing users to overcome their fears and frustrations.

It answers hundreds of common questions, including Can I delete data from a spreadsheet without changing the formatting? How can I merge two cells, columns, or rows? How do I use text-wrapping? How do I create custom functions? What is a Macro and how do I go about creating it?

Intended for the roughly 40 percent Excel users who have never even entered a formula, this book will demystify the problems and confusion that prevent them from using the program to its potential.

## Description:

Microsoft's revolutionary Power Pivot is a tool that allows users to create and transform data into reports and dashboards in new and much more powerful ways using the most-used analytical tool in the world: Excel.

This book, written by a member of Microsoft's Power Pivot team, provides a practical step by step guide on creating a financial dashboard.

The book covers in detail how to combine and shape the relevant data, build the dashboard in Excel, providing layout and design tips and tricks, prepare the model to work with fiscal dates, and show values used in many financial reports, including year-to-date, variance-to-target, percentage-of-total, and running totals reports.

Though the guide focuses on Power Pivot for Excel 2010, a chapter that discusses Power View—compatible with Excel 2013— and Power BI is also included.

# EXCEL ADD-INS

*Excel add-ins are extra features that are not available with current Excel versions.*

*They are usually created out of user need and demand and can save you lots of time!*

*Add-Ins vary and are accessible from your Ribbon menu and are relatively cheap.*

| **Created By:** | Jon Acampora – ExcelCampus.com |
| **Purchase Link:** | www.myexcelonline.com/blog/tabhoundaddin |
| **Price:** | $29 |

## Description:

If you have a workbook with lots of worksheets (sheets) then you know what a nightmare it is to navigate to the sheet that you want. Imagine if you had over 10 sheets or even 50 sheets, which is usually the norm for many finance analysts, how time consuming that would be!

This game changing Excel Add-In will get rid of all those problems plus many more! It will make you much more productive and you will learn the tricks the pros use to work efficiently in Excel.

Ever since I started using Tab Hound I quickly saw a dramatic increase in my efficiency and I have been using Excel for more than 15 years!

**Let me tell you about some of the cool features. You can:**

- Search and go to a sheet name with the built in search bar;
- Flip back between sheets which allows you to jump to another sheet that references a formula or to quickly copy and paste data between sheets (Awesome feature!);
- Hide/Unhide multiple sheets with a simple press of a button;
- Add a Table of Contents which allows users to go to a sheet with a simple click.

| **Add-In Name:** | **PivotPower** |
| **Created By:** | Debra Dalgleish – Contextures.com |
| **Purchase Link:** | www.myexcelonline.com/blog/pivotpoweraddin |
| **Price:** | $59 |

## Description:

The PivotPower Add-In is developed by Debra Dalglish who is a legend when it comes to Pivot Tables.

She has authored various books on Pivot Tables so it's no secret that she knows what she is talking about when it comes to Pivot Tables and Excel Add-Ins.

The PivotPower Add-In was developed to reduce the gap between the tools that are available in the PivotTable Tools Ribbon and what every day users really wanted it to include.

Such default nuances like the Autofit Column Widths, the ugly default Pivot Table Style, lack of Number Formatting, unsorted Field List and default Report Layout are all a thing of the past with a press of a button.

**Some other great features are the ability to:**

◆ Clear old items from Pivot Table drop downs;

◆ Change all the data fields from the Count function to the Sum function;

◆ List all the Pivot Tables that are active in a workbook with its key metrics;

◆ … heaps and heaps of other time saving buttons!

|---|---|
| Created By: | Chris Macro - thespreadsheetguru.com |
| Purchase Link: | www.myexcelonline.com/blog/e2paddin |
| Price: | FREE for 7 days/$78 |

## Description:

This add-in reduces your PowerPoint creating time.  There are 3 main tasks that every data analyst must be able to do

- Gather the data
- Analyze the data
- Present the data

While there have been enormous amounts of effort towards creating tools that can help automate the first two tasks listed above, the third (presenting data) seems to be overlooked far too often.

Most analysts spend hours copying and pasting Excel charts and data tables into PowerPoint every.

This Excel add-in saves HUNDREDS of hours in PowerPoint creation!

**Add-In features include:**

- Mapping With the E2P Table
- Getting the Perfect Placement
- Multiple Exporting Options

| **Add-In Name:** | **The Waterfall Chart Creator** |
| **Created By:** | Chris Macro - thespreadsheetguru.com |
| **Purchase Link:** | www.myexcelonline.com/blog/waterfalladdin |
| **Price:** | $25/$50 |

## Description:

Waterfall charts are highly sought after in the corporate environment and they show the differences between actual and budget numbers in a visual way. The issue is that you would need to know advanced formulas to create a waterfall chart but with this add-in you are spared the trouble.

These graphs do a tremendous job of quickly showing different variance buckets between two data points (typically over a period of time - sometimes called a "data walk"). The single thing that trips many analysts up is the complexity surrounding the setup and formatting of these graphs.

**Add-In features include:**

- Generate in seconds
- Clean, Professional Format
- Customize to fit your needs
- Instructions

| **Add-In Name:** | **Unviewable +** |
| **Created By:** | Spreadsheet1.com |
| **Purchase Link:** | www.myexcelonline.com/blog/unviewableaddin |
| **Price:** | $94/$235/$565 |

## Description:

Unviewable+ has an extremely simple interface and gets you protecting your Excel, PowerPoint, or Word VBA projects fast!

First, you will want to make a backup copy (or two) of your file because once it gets put through Unviewable+, that code is going to be out of your grasp.

So let's take a look at how easy it is to protect your VBA projects.

**Different Levels of Protection**

Unviewable+ offers a few different levels of protection based on how compatible you want your code to be and how difficult it would be for someone to hack into your code. I would note that all methods of protection provided by this software are viable options and only a seasoned hacker on a mission is going to be able to bypass any of these protection strengths. Your average data analyst or IT person is not going to have a clue how to get to your code.

The great thing about having so many protection options, is that you can start with the highest protection strength (Ultimate) and if one of your users runs into issues, you can lower the protection strength in a separate version until you can provide a compatible file for that individual's system.

| Add-In Name: | **Password Recovery** |
|---|---|
| **Created By:** | Chris Macro - thespreadsheetguru.com |
| **Purchase Link:** | www.myexcelonline.com/blog/pwrecoveryaddin |
| **Price:** | $45 |

## Description:

Have you ever forgotten an Excel or VBA project password?

Did someone leave your company and can't be reached to provide you with their passwords?

These types of situations seem to happen all too often in our corporate and personal lives and sometimes they can lead to DISASTERS!  A Janrain study found that nearly 2 in 5 people have to ask for assistance in remembering either a username or password every single month.

Unique passwords take a lot of effort to keep track of and it's easy to mix them up when it seems every computer application requires some sort of log-in nowadays.

Imagine spending hours on an in-depth financial forecasting model and losing the password to unlock its worksheets and make critical changes to the formulas.  Without that access, you may be left spending the next week (or even month) trying to recreate your glorious model that was so good at pumping out such accurate forecasts for your company.

Luckily, this Excel add-in can relieve your stress in seconds as your precious spreadsheets are quickly and easily unlocked so you can re-gain access to all your valuable data and formulas.
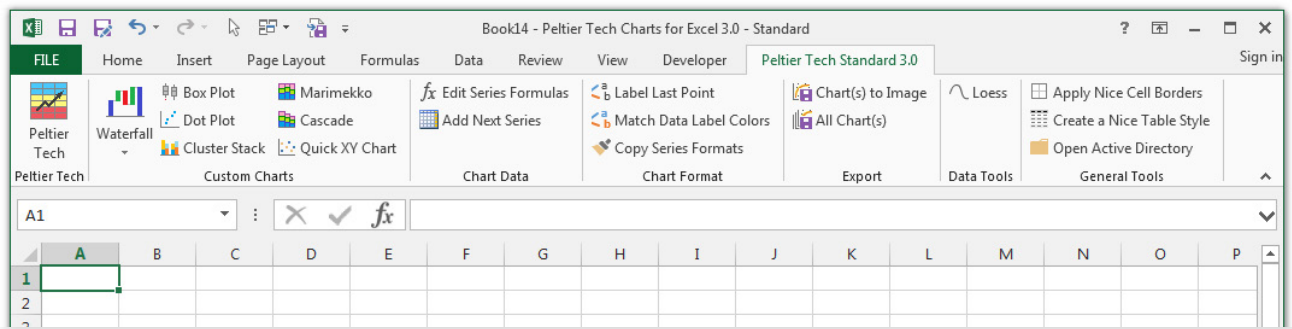

| Add-In Name: | **Peltier Tech Charts for Excel** |
|---|---|
| Created By: | Jon Peltier – peltiertech.com |
| Purchase Link: | www.myexcelonline.com/blog/peltierchartaddin |
| Price: | $79/$99 |

## Description:

There are several default charts with Excel 2007, 2010 and 2013 but many Excel users throughout the years have been creating new charts by way of using lots of advanced formulas and imagination.

This add-in introduces these new must have analytical charts with the press of a button, so no more wasting time and fiddling around with formulas.

Jon Peltier is the leader in Excel charting and this add-in simplifies the process for several chart types.

**You get the following charts with this add-in:**

- Waterfall
- Box Plot
- Cluster Stack
- Marimekko
- Cascade
- Dot Plot
- Histogram
- Pareto

These new charts have been implemented in the latest Excel version 2016 due to the popularity of this add-in.  If you don't have Excel 2016, then I highly recommend getting your hands on this add-in.
